

BOAT SECURITY

Protect your outboard engine

Norfolk Constabulary has set up an initiative which helps to reduce the chances of your outboard engine from being stolen.

The initiative has been rolled out in many parts of Norfolk and is proving to be successful among the boating community.

The outboard engine security cover is designed to replace the outboard cowling when the boat is not in use, making it less attractive and devaluing the engine to potential thieves.

The cover is made of PVC, has breathable holes to combat condensation and is designed to keep the weather out. The cover is available in three sizes:

- Small (outboards up to 6HP) **£28**
- Medium (outboards up to 15HP) **£32**
- Large (outboards up to 40HP) **£36**

For further information or to order an outboard motor security cover please contact PCSO Martin Chapman at:
