

EACC's now retired strimmer is for sale!

This machine has given many years of faithful service on the Club moorings, but it has just been replaced for a brand new one. It's a commercial machine, strongly built and very powerful. It comes with a good selection of accessories as pictured and is a complete kit ready to use without further cost. It even has some 2-stroke oil and a spare spark plug! All you need to buy is the fuel.

It's being offered to Club members first at the bargain price of £50 the lot. First come, first served. And the judge's decision is final on that 😊
